

CORONAVIRUS: COVER YOUR FACE TO STAY SAFE

Coronavirus is spread easily and is deadly. Cover your nose and mouth with a cloth face covering when you have to leave the house to help stop the virus from spreading

Cloth face coverings include scarves, bandanas or cloth face masks. **Do NOT** use a face mask meant for a healthcare worker

Wash your cloth face covering often especially after sneezing or coughing

Do not place a cloth face covering on children under 2 years old, someone who has difficulty breathing or who can't remove it on their own

Do not move the cloth face covering from your mouth and nose after you put it on

Do not touch the cloth face covering, or your face, eyes, nose and mouth while you are wearing it

Wash your hands before and after putting on a cloth face covering

Practice social distancing and **stay at least 6 feet away** from people when in public, even when wearing a cloth face covering
