

# CORONAVIRUS SYMPTOMS: WHAT YOU NEED TO KNOW

**Anyone can have** mild to severe symptoms of Coronavirus.

**Older adults and people** who have underlying medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing more serious complications from coronavirus.

**People with coronavirus** have had a wide range of reported symptoms. Symptoms can appear 2-14 days after exposure to the virus and may include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

If you are experiencing any of these symptoms, stay home and call your doctor as soon as possible. **If you do not have a doctor, call 211.**

**Emergency warning signs** for COVID-19 include:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

If someone is showing any of these signs, **seek emergency medical care immediately and call 911.**
