Anyone can have mild to severe symptoms of Coronavirus.

Older adults and people who have underlying medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing more serious complications from coronavirus.

People with coronavirus have had a wide range of reported symptoms. Symptoms can appear 2-14 days after exposure to the virus and may include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

If you are experiencing any of these symptoms, stay home and call your doctor as soon as possible. If you do not have a doctor, call 211.

Emergency warning signs for COVID-19 include:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

If someone is showing any of these signs, seek emergency medical care immediately and call 911.
